Symposium on Evolutionary Psychiatry

Friday, November 7th, 2025
from 13:30 to 17:45

Madam, Sir, Dear Colleagues,

It is with great pleasure that we invite you to our Symposium on Evolutionary Psychiatry taking place on Friday, November 7th, 2025.

Evolutionary psychiatry is inspired by insights and concepts from evolutionary theory and ethology to address enduring questions such as why rather than how psychiatric disorders come along or why severe and harmful psychiatric diseases remain so common in our societies.

The aim of the Symposium is to present evolutionary insights by renowned speakers and to exchange with them on how the human mind has been forged over evolutionary times and evoke links with current psychopathology. We wish to raise awareness among interested attendees about the evolutionary perspective on psychopathology.

The programme will gather prominent European representatives in the fields of evolutionary psychiatry and palaeontology.

We are very excited to welcome you to this afternoon!

Pr Armin von Gunten
Pr Pierre Vandel
